Masters Thesis

John Gilbertson

A thesis presented for the degree of
Master of Science (Mathematics and Statistics)

Supervised by Professor Peter Taylor
Department of Mathematics and Statistics
The University of Melbourne

October 2016

Declaration

This thesis is the sole work of the author whose name appears on the title page and it contains no material which the author has previously submitted for assessment at the University of Melbourne or elsewhere. To the best of my knowledge and belief, the thesis contains no material previously published or written by another person, in the form of unacknowledged quotations or mathematical workings or in any other form, except where due reference is made. I declare that I have read, and in undertaking this research I have complied with, the University's Code of Conduct for Research. I also declare that I understand what is meant by plagiarism and that this is unacceptable.
